1. The Technical Aviation Institute is at present evolving plans for the construction of a helicopter for serial production. The present work of the institute is concentrated on designing a type of helicopter with a speed up to 200 km. per hour, a climbing speed of 8 meters per second, and a ceiling of 7,000 meters. This helicopter is intended for the transport of cargo and passengers for distances up to 250 km.
2. The prototype of a single-seater helicopter, built according to a design by Eng. Zurakowski and tested in 1951, was conceived only for propaganda reasons.
